

THE MOST COMMON  
**SIGNS AND SYMPTOMS**  
 OF  
**PET PAIN**

**NOT GOING UP OR DOWN STAIRS**  
 This could be an early sign of osteoarthritis or other mobility conditions.

**RELUCTANCE TO JUMP ONTO SURFACES**  
 This mobility issue especially applies to cats.

**DECREASED ACTIVITY**  
 Take note if your pet is not playing as much as they usually do.

**IS YOUR PET IN PAIN?  
 WE CAN HELP!**

**DECREASED APPETITE**  
 This can signal mouth pain.

**HEAVY OR SHALLOW BREATHING**  
 A sign that it hurts to take a breath.

**SHAKING OR TREMBLING**  
 Don't assume your pet is cold, or the trembling is age related. Both can be a sign of pain.

**DIFFICULTY RESTING**  
 If your pet is hurting, it can make it difficult to sit or lie down.

**CONSTANT LOCALIZED GROOMING**  
 Pets in pain often lick their paws repeatedly to self soothe.
