

CannaNatural

CannaCrush

CannaCrush Immune Supporter

CannaBalm

DESCRIPTION

Our original product is a high-quality joint formula that contains 2 mg of Organic PCR hemp oil per piece and is made with premium ingredients: green-lipped mussels and salmon oil. Ideal for movement and joint concerns.

The same high-quality joint formula as CannaNatural, works well as a food topper. Best for movement concerns in cats and small dogs.

This formula combines our original CannaCrush with USDA Certified Organic full-flower turkey tail mushroom to enhance the immune response in pets

Our topical formula nourishes and protects the skin, while providing all the benefits of an oral application. Can be used for achy muscles, uncomfortable joints, cuts, rashes and hotspots.

DOSAGE

Use one piece per 20 lbs. of pet weight. Each piece contains 2 mg PCR hemp oil and 400 mg green lipped mussel.

Use 1/2 teaspoon per 10 lbs. of pet weight.

Use 1/2 teaspoon per 10 lbs. of pet weight.

For wounds, hotspots, cuts, scrapes or rashes apply directly to affected areas as needed. For movement concerns, rub into the inside of legs, shave hair if applying to long-haired animal. Can also be applied on the inside of ear for allergy concerns.

CannaDrops

CannaDrops Immune Supporter

CannaSpray

CannaDrops Equine

DESCRIPTION

Our liquid and most cost-effective formula comes in coconut and salmon flavors. Ideal for large or small animals, with fast acting results!

This formula combines our original coconut CannaDrops with USDA Certified Organic full-flower turkey tail mushroom to enhance the immune response in pets

The same formula as our CannaDrops in either coconut or salmon, with an easy spray application for increased coverage area. Best for pets with oral care concerns, and to support gum tissue health.

Our CannaDrops formula with equine dosage! Best for horses with trailer anxiety, stiffness, and aches.

DOSAGE

CannaDrops 200: Use 1 mg (6 drops) per 10 pounds of animal weight.
